Published annually, ISJ’s Sugar & Ethanol Buyer’s Guide is a comprehensive and convenient information source of sugar and ethanol suppliers’ products and services. It is an essential guide for key purchasers and sugar processing and refining managers.

The Buyer’s Guide is distributed to sugar mills, refineries and factories, food manufacturers, ethanol and biofuel producers and services companies in more than 100 sugar growing and producing countries. The Buyer’s Guide is also available as a downloadable pdf on the journal’s website.

The first half of the directory lists product categories and the businesses that supply them. Once you have identified the companies that provide those products and services, their contact details can be found in the second half of the directory.

As part of the International Sugar Journal portfolio we hope that you find this Buyer’s Guide as useful as our journal, maps and website and keep it as a convenient and quick way to find key suppliers for your business.
